Jr. MERN Stack Developer specializing in REACT, with expertise in TailwindCss building responsive and scalable web applications using React, and Tailwind CSS. Skilled in API integration, state management, and delivering clean, user-focused interfaces within collaborative team environment and some experience in backend like in Node RESTAPI.

EXPERIENCE

DEC 2024 — PRESENT

FRONTEND DEVELOPER, (PESHAWAR)

Built high-performance react interfaces for diverse projects, focusing on scalable components and responsive design. Transformed complex requirements into interactive frontend solutions with seamless API integration and optimized performance.

JAN 2026 — PRESENT

BACKEND DEVELOPER, (PESHAWAR)

I learned MERN Stack with some experience in Node RESTful APIs, and Database Modeling.

EDUCATION

SEP 2022 — PRESENT

BACHELORS UNIVERSITY OF PESHAWAR

MONTH YEAR

INTERMEDIATE, JAHANZAIB COLLAGE SWAT

SKILLS

BACKEND & DATABASES

- REST APIS
- MYSQL/MONGODB
- NODE.JS
- EXPRESS

FRONTEND

- REACT
- TAILWINDCSS

CORE

- JAVASCRIPT

TOOLS

- GIT/GITHUB
- VS CODE
- POSTMAN

PRIME PROJECTS

BACHA SHOES COLLECTION

Bacha shoes collection provides a comprehensive online shopping platform for its entire shoe collection, serving customers across Pakistan with home delivery.

- Providing QR Codes for staff's ID Card to scan for an auto Log In.
- Customers can use a dedicated Order Status portal to monitor their shipments in real-time.
- Items purchased online are subject to a structured Exchange & Refund Policy if the size or style does not meet expectations.
- Reports also include sales made by each vendor on a particular day, week, month etc.
- We furnished reports regarding quantity sold or returned of each product in a day etc.
- Running on Local server set-up with online database sync. every 4 hours.

SHARMA GI TRAVEL

The **Sharma Ji Travel** project is a high-performance React application featuring a real-time booking dynamic destination filters, and a responsive UI designed for a seamless user experience across all device It showcases your ability to handle complex state management for travel itineraries while It showcases your ability to handle complex management system for travel itineraries while ensuring fast load times and an intuitive interface

- A multi-step booking workflow with state-driven from for seamless travel reservations and itinerary planning.
- Real-time notification.
- Cart for each user.
- Orders by user.
- keeping record of daily order.
- Returns of Orders.
- activation and de-activation of staff by admins.
- Printable reports, invoices.
- Only used frontend

TIC TOE GAME

This **Tic-Tac-Toe** project highlights my **React** skills by using the useState hook to manage real-time board updates, alternating player turns, and instant win-logic detection within a responsive, component-based architecture.

- Leverages the useState hook to maintain a reactive game board and alternate player turns seamlessly
- Implements a high-performance algorithm that instantly validates moves against eight winning combinations.
- Built using reusable functional components for the squares and grid to ensure a clean, maintainable codebase
- Features an undo/redo capability that allows users to jump back to previous board state
